

# 2023 School Improvement Plan Summary

## Renmark West Primary School

Goals	Targets	Challenge of Practice	Success Criteria
<p>To increase the number of students with higher level achievement in reading</p>	<p><b>2022:</b>                      33% of year 3 students (7) 28% (4) year 5 students achieved higher bands in English (Not Achieved)                      75% of students in year 1 scored 28 or above in the phonics screen testing (Achieved)                      60% of year 4 students achieved greater than 115 in the PAT reading test (Achieved)                      47% of year 6 students achieved greater than 125 in the PAT reading test (Not Achieved)</p> <p><b>2023:</b>                      35% of year 3 (5 students) and 40 % of year 5 (7 students) will achieve in the higher bands for NAPLAN English.                      70% (12 students) of year 1 will achieve 28 or above in the phonics screen test in term 3.                      50% (9 students) in year 4 will achieve a scale score above 115 and 60% of year 6 students (9 students) in year will achieve a scale score above 125 in PAT reading.</p> <p><b>2024:</b></p>	<p>If we effectively implement the Australian Curriculum with a focus on high impact pedagogy we will increase high level achievement in reading.</p>	<p>We will see each student be able to fluently read increasingly complex texts when we regularly assess using a 1 minute fluency test once a term.</p> <p>We will see each student able to use sounding out strategies to decode unfamiliar words when we assess using the cumulative Initial Lit assessments and during our reading conferences.</p> <p>We will see each student use explicitly taught comprehension strategies when we conduct individual reading conferences and reciprocal/guided reading sessions.</p> <p>We will hear each hear each student compare and analyse information in different and increasingly complex texts, explaining literal and implied meaning when we conduct reading conferences, reciprocal reading and guided reading.</p>
<p>To Increase the number of students achieving in the higher bands in mathematics.</p>	<p><b>2022:</b>                      8% of year 5 (1) 24% of year 3 students (3) achieved higher bands in mathematics in 2022. (Goal Not Achieved)                      70% of year 4 students achieved a scale score of 120 or above in PAT Maths (Achieved)                      59% of students in year 6 achieved a scale score of 125 or above in PAT Maths (Nearly Achieved)</p> <p><b>2023:</b>                      90% of year 2 students will achieve a scale score above 95.                      27% of year 3 students (5 students) and 33% of year 5 students (6 students) achieve in the higher bands in</p>	<p>If we implement the Australian Curriculum incorporating number talks and the Big Idea in number we will see improved outcomes in mathematics for our students.</p>	<p>Rec – use counting strategies to solve problems using manipulatives</p> <p>Year 1 – carry out simple additions and subtractions using counting strategies</p> <p>Year 2 – perform simple addition and subtraction calculations using a range of strategies</p> <p>Year 3 – solve problems using efficient strategies for multiplication, with and without the use of digital technology</p>

	<p>NAPLAN mathematics in 2023.  70% of year 4 students (14 students) achieve a scale score of 120 or above in PAT maths.  70% of year 6 student (10 students) achieve a scale score of 125 or above in PAT maths.</p>		<p>Year 4 – choose appropriate strategies for calculations involving multiplication and division, with and without the use of digital technology</p>
	2024:		<p>Year 5 – solve simple problems involving the four operations using a range of strategies, including strategies that use digital technology</p>
	2023:		
	2024:		<p>Year 6 – solve problems that involve all four operations with whole numbers, solve problems involving the addition and subtraction of related fractions</p>
